

# Cenobites

Cenobites, the psychobillyband from Rotterdam, are rocking since 1994 all over the world on festivals, in squads and everywhere where there is something to celebrate.

Everywhere from Brazil to Berlin, from Jakarta to Barcelona and from Rotterdam to Los Angeles the rough mix of punk and psychobilly is pumped through your eardrums and into your veins. With this evil combo every show all hell breaks loose and it's played as if it is their last show ever.

Six albums plus several singles and splits singles, which are bursting out with their wayward rock; the legendary CENODEMONIC sound, are the discography of the Cenobites who in all those years have never left their musical course.

Currently Cenobites are working on their sixth studio album and are making sure true psychobilly will survive.
